

The Battle Over North Carolina's State Health Plan

A presentation by

North Carolina State Treasurer

Dale Folwell

Treasurer Folwell rolled out his proposed changes to the State Health Plan at the end of last year. His proposal seeks to create transparency in hospital pricing, give consumers power in the health care purchasing process, reduce surprise bills, and reduce taxpayer liability on our underfunded State Health Plan. This has sparked fierce reaction from the powerful health care industry which has responded with a media campaign and legislative action to strip Folwell of authority to implement his plan.
