What is CRT?

by R. Alan Harrop, PhD
harropcrew1@gmail.com

*He might be #45
but to most of us, he's...*

Number ONE

We're ready for rallies again! Trump boat parades and street parades have started, and freedom rallies can't be far behind. We've been cooped up and living behind a mask for far too long. It's time to rip off the mask and get outside in the fresh air and sunshine. That sentiment is obviously shared nationwide because that is what is spurring the desire to gather with like-minded people and support and celebrate a common cause. We need to take a page from the radical's playbook. We give them an inch, and they take a mile. Now, **each village, town, and city in our state should issue our own mandates to counter our tyrannical Governor that free us to take off the mask, open churches, schools, and businesses, and not require a mask to enter any of these.** Why can't we go on the offensive for once and ACT instead of react? That's what President Trump did, and it kept them off balance because they had never experienced that boldness. He taught us so much during his four years in office, and if we are willing to act on it, we can regain our freedoms. If you want to continue to wear a mask, have at it, but that doesn't give you the right to impose that on the rest of us. If fear drives you to social distance, then please do so, but why do we need to when we are not afraid? The Michigan Governor is proposing that all children between the age of two and four should attend daycare and masks are mandatory. This woman's power has driven her

mad. Her hammer is that she will yank their business licenses if day care providers do not comply. Our governor will do the same to small businesses such as hair and nail salons. Individually, these businesses do not have the resources to fight back, and that is why we as a group must go on the offense for them before it's too late. **Winston Churchill** said, "*If you will not fight when your victory is sure and not too costly, you may come to the moment when you will have to fight with all the odds against you and only a precarious chance of survival. There may be a worse case. You may have to fight when there is no hope of victory, because it is better to perish than live as slaves.*"

What is happening in our country right now is a **peaceful revolution**. It is very similar to the revolution that took place in 2009 and 2010. However, there are some very stark differences. In 2009, we could peacefully march with no violence because there were no **BLM** or **Antifa thugs** intimidating or threatening us during our protests. We followed the rules and obtained the proper permits, and the opposition did the same. Now, the revolution is on social media and in the legislatures and courtrooms. The peaceful marches are almost nonexistent today because the violent members of **BLM** and **Antifa** have assaulted and brutally beaten participants; it has now become life threatening to even be a

bystander. However, they have not shut us down, and we are winning in a hundred ways every day. Our victories will never make headline news, but new web sites that will allow free speech are frequently debuting. It's important to keep our slow, determined march as peaceful as possible. Our peacefulness makes the violent organized criminals who rampage undeterred through our cities totally exposed for what and who they are. And to make it even more obvious this week, **Maxine Waters** traveled to **Minnesota** to incite the perpetrators to commit more destruction. That should leave no doubt as to the nexus of the rioting and looting that has occurred over many months and years. Representative Waters simply proved what so many on the left have consistently denied. The radicals believe that violence against law abiding citizens is their path to victory, and virtually all of it is taking place in Democrat or RINO controlled cities because it goes unpunished there, and they know it. However it does grab headlines and helps accomplish **their goal to "Intimidate and Dominate."** **No more! We need to carefully choose the spots for our rallies and parades in conservative parts of the country where we'll be properly protected by sheriffs' offices and/or the police, but we need to get out there and do them. If we take a step back now, we risk losing our country to these communists. Peaceful and legal means to save our country is OUR goal, but that should not be mistaken as cowardice. As President John F. Kennedy said, "Those who make peaceful Revolution impossible, make violent revolution inevitable."** **Election Integrity is our most important battle. If we achieve that, we will be astonished at how many of the corrupt cities, counties, and states will be defeated.** The corrupt people on both sides of the political spectrum have controlled us for years by stealing our voting rights. **Our numbers are far greater than theirs, but as has become a stark reality in recent months, those in power make the rules in spite of the Constitution, not according to it, and until now, we've let them get away with it. Enough!** Just like in China, the result is that the majority is ruled by the

Critical Race Theory (CRT) is a theory proffered by leftist academics which claims that all of American society is inherently racist and can never treat people of color as true equals. A color blind society can never be achieved. Advocates of CRT believe that whites are inherently racists and that American society must be dismantled and replaced. The goal is to teach whites not to be whites since they are incapable of being anything but racist. The only remedy for past white racist discrimination is black racist discrimination. Science, reason, and fact based knowledge are forms of white racism and must be replaced by storytelling and life experiences. Western culture developed by whites must be rejected along with capitalism and replaced with socialism/communism. Every aspect of society and culture is seen through a racial lens.

The 1619 Project developed and advocated by Nikole Hannah-Jones (a leftist journalist with *The New York Times*) is an extension of CRT that adds the idea that the white race is the biggest murderer, rapist, pillager, and thief in the modern world. In addition, it says that America was founded not to promote liberty but to preserve and protect the slavery upon which it was founded. Consequently, America can never be a non-racist society. Reparations are necessary to make the whites pay for their racial discrimination.

Instead of moving America towards racial equality and a

few. The Chinese Communist Party rules with an iron fist, and that is what the corrupt politicians here are planning for us. President Trump is a divine gift to us from God. He awakened a dormant patriotism just in time to save us from ourselves. As patriots, regardless of political party, our goal is to Save America. In China the people have no choice politically; they are forced to fit in or face death or internment. Jim Caviezel said, "You were not made to fit in. You were born to stand out." **It is high time that we begin standing out; we want President Trump to know we are willing to stand strong, but we are relying on his promise that "The Best Is Yet To Come."**

Patriots and President Trump, how will we complete our "Incomplete" grades?

color blind society, these ideas actually do the opposite. They teach white children that they are inherently racist no matter what they do. Black children are taught that if they are unable to achieve, it is not due to a lack of effort or self-discipline, but is due to the inherent racism of America. White children are taught to feel guilty for being white, and black children are taught to be victims. This is equally harmful to all. CRT emphasizes recognizing others by their skin color rather than the content of their character or the quality of their behavior. This is in direct opposition to the belief of Dr. Martin Luther King, Jr. that people should be judged by the content of their character, not the color of their skin. With the CRT mindset, race becomes all important and prominent between people.

If the "principles" embodied in CRT and The 1619 Project are allowed to be taught in our public schools, they will fan racial animosity and undo the progress that has been made since the civil rights movement in the 1960s. America's white children will be ashamed of their country, and America's black children will hate theirs. America will be divided which is exactly what the socialists want. The higher achieving students and schools will be castigated. Everyone must be equally low achieving. How else can a socialist/communist environment in which the masses are needy be achieved? Grading student performance, standardized testing, requiring proper grammar, requiring proper spelling, and teaching math are all racist. White students must admit they are inherently racist, and that is true even if their best friend since kindergarten is black; there is simply no way a white can avoid being racist.

This cannot be allowed to happen. Join the fight against Critical Race Theory. Organize, or join an organization like our Coastal Carolina Taxpayers Association (CCTA) that opposes CRT. Let your local Board of Education and school superintendent know you do not want Critical Race Theory taught in your local schools. To arm yourself for the fight, do your own research. Some of the websites I find especially helpful include The Federalist, Parents Against Critical Race Theory, and the Education First Alliance. I'm sure you can find others. If we allow garbage like this to be taught in our schools, we will short-change every public school student in NC.
